

EDITING, UPDATING and ACCESS to your WEBSITE

Access to your website control panel is restricted. The reasons for this are:

- All websites are hosted on my own server space with crucial.com.au in Sydney, Australia. Therefore anyone accessing the server could bring a potential virus onto the server, or make a change which not only affects their own site set up, but another client as well.
- I believe best results come from a partnership where you have all the time you need to work in your business, and I in mine.
- To practically facilitate this, I offer a small amount of free updating per month so you can email website changes and have me add it, keeping your site up to date and interesting. This benefits you, me, your visitors and your web page search results and ranking.
- My website hosting company is excellent. Their level of customer support and experienced technicians gives everyone a stress free hosting experience.
- You are able to have a copy of ALL your website files at any time once all invoices are paid, directly from our shared Dropbox folder.
- I have now provided the option of Work Schedules, to facilitate a monthly or quarterly updating option for clients who are serious about keeping their websites optimised and up to date.
- If you are looking for a website you can access yourself, I am not the designer for you.
